Airgas Refrigerants

Airgas Refrigerants supplies the widest selection of refrigerant gases coast to coast. Next day delivery is available anywhere in the contiguous U.S. including all HFC refrigerants such as R-407A, R-422D and R-427A, as well as all CFC and HCFC products. Airgas offers the most comprehensive recover/reclaim program in the industry including on-site reclamation and on- and off-site field services.

The Dow Chemical Company

The Dow Chemical Co.'s Dowfrost heat-transfer fluid is the ideal choice for secondary-loop refrigeration systems. Dowfrost fluid contains specially formulated packages of food-grade industrial inhibitors that help prevent corrosion. Because propylene glycol fluids are low in acute oral toxicity, they can be safely used in applications where incidental contact with food or beverage products could occur. A.O. Smith Electrical Products Co.

Many retailers are now retrofitting inverters to their existing A/C and refrigeration equipment only to discover that the OEM motors do not hold up to the strain that inverters place on them. Juggernaut inverter duty motors from A.O. Smith Electrical Products Co. are the first in the industry to hold up to these rigorous demands. Circle 115 on the reader service card.

Energy Conservatory

The Energy Conservatory is the leading manufacturer of building-performance diagnostic tools. These include the Minneapolis Blower Door system for measuring the airtightness of buildings; the Minneapolis Duct Blaster system for measuring the airtightness of ductwork; the TrueFlow air-handler flow meter; and the DG-700 pressure and flow meter. The Energy Conservatory is the company to turn to for the highest-quality equipment and the best technical support in the industry.

Bitzer

Bitzer's Orbit 8-series R410A scroll compressors are offered in 15-, 20-, 25-, 32-, 35- and 40-ton capacities. Features include lower sound by 3 dB, lighter weight, and lower oil-circulation rates than the competition. The compressors are built in the company's new Syracuse, NY factory. Circle 116 on the reader service card.

Fieldpiece Instruments

The newest HVAC Guide System Analyzer, model HG2, is Fieldpiece's next generation analyzer, leading technicians step-by-step through critical tests, including target evaporator exit temp, target superheat, superheat, subcooling, combustion—and now the CheckMe! diagnostics program. Enter data on the input form, get results and recommendations from the output form, and more. Circle 119 on the reader service card.

Clight Manufacturing

Super Seal Ultra from Clight Manufacturing gives a one-two punch to moisture and micro leaks in A/C and refrigeration systems.

Use Dry R to eliminate moisture, followed by Super Seal HVACR to stop existing leaks and future leaks. Perfect for 1.5 ton–5 ton residential systems. Circle 117 on the reader service card.

ICOR International

ICOR International Inc. has launched an online Virtual Training Center within its Web site. The site allows users to get ahead of the R-22 phaseout curve on their own schedule by providing access to training programs 24/7/365. ICOR has been a leader in refrigerant-user education since 1995, and all of its programs are NATE-certified.
